Introducing memoAIzed

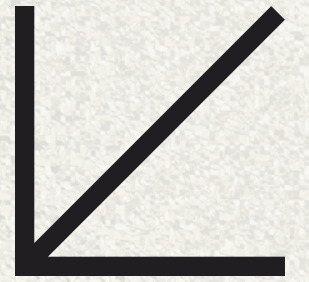

A solution to image generation pollution!

memoAIzed recycles similar prompts spassed to Amazon Titan in order to save the large amounts of energy consumed by globally redundant prompting

1 image generation using Gen AI costs

1 full smartphone charge

Up to present day, we have used

67.5 billion watts (67.5 GW) in energy using image generation

Which could power

New York City for 6 days

While 1 Gen AI text generations cost

**1% of the energy
consumption of 1
AI image
generation**

or only 0.016% of a smartphone charge
